The 3rd Annual McGaugh-Gerard Lecture on Learning and Memory

Three Lessons About the Brain

The Center for the Neurobiology of Learning and Memory is pleased to welcome Dr. Lisa Feldman Barrett, Distinguished Professor of Psychology at Northeastern University, for the 3rd annual McGaugh-Gerard Lecture on Learning and Memory.

Dr. Barrett will break down three key ideas about the brain's inner workings.

- How your brain's most important job is keeping your body running smoothly.
- How your brain is constantly predicting what will happen next rather than reacting to the world.
- How feeling and thinking and even seeing follow from your brain's plan for action; your brain prepares your behavior first and creates your lived experience in the process. [Learn More](#)

4:00 pm - 5:00 pm

 **VIRTUAL**  **IN-PERSON**

The Social Neuroscience Behind Face-to-Face Diplomacy?

UCI Center for the Neurobiology of Learning and Memory, UCI Brain, and UCI Conte Center will host guest speaker Dr. Marcus Holmes, professor of government at The College of William and Mary. [Learn More](#)

[Perspectives on Political Violence](#)

[UCI Center for Neuropolitics](#)

October 25, 2024
10:00 am - 2:00 pm

 **VIRTUAL**

The UCI Center for Neuropolitics Symposium will address political violence in all its complexities. The symposium will use the tools of neuroscience, political

science, history, and psychology to comprehensively analyze the disturbing development and potential emergence in American life. The Symposium includes the 2024 Jerrold Post Lecture on Neuropolitics, to be given by Ruth Ben-Ghiat. [Learn More](#)
